A dynamic alternative

Grant Thornton South Africa's roots can be traced back over 100 years. Today we are firmly ranked as leaders in our chosen markets.

Grant Thornton provides assurance, tax, advisory and outsourcing services to dynamic organisations in both the private and public sectors. This includes listed companies, large privately held businesses and private equity-backed organisations. In the public sector we work with national, provincial and local government as well as State Owned Enterprises and Development Finance Institutions.

Our growth agenda

We are committed to shaping a vibrant economy by creating commercial and social environments that enable long-term success and growth for government and business, where people flourish.

Grant Thornton South Africa achieved growth of over 10% in the last financial year - by 2020 we aim to be the leading business advisor to dynamic organisations.

Transformation

Grant Thornton in South Africa is committed to transformation which is a key business imperative for us and not a mere obligation.

Our objective is to move forward in transforming Grant Thornton with representation across all levels, including leadership and ownership, which reflects the demographics of our country.

Evidence of our commitment to the implementation and improvement of our B-BBEE scorecard is: - our active learnership programme which provides financial assistance to students studying to become chartered accountants; our active employment equity committee; and our involvement in enterprise development initiatives as well as socio-economic development initiatives, which includes both mentorship and funding.
