

Cloud Based Business Process Solutions

Why cloud business solutions?

With traditional legacy desktop software, your data lives on computers. This means it is only available on limited devices and to a limited number of people.

With cloud software, your data lives online, so your data and financial reports are always accessible from anywhere at any time.

Which software?

We prefer Xero accounting software as an application for bookkeeping and accounts as it has millions of system users. Instead of maintaining business records on papers, spreadsheets or legacy desktop software packages, you can post and access your accounting records via the internet. However, we can provide services using your software of choice, e.g. QuickBooks or SageOne.

Collaboration in the cloud

Working closely with SNG Grant Thornton is easy with Xero, as it connects your business with us anywhere and anytime - perfect for unlocking growth opportunities in your business.

Mobile access

Run your business from anywhere with the Xero Mobile App. It's easy to send invoices, approve expenses, input receipts and reconcile bank statements. So you can set up your office wherever you want.

Dashboards and reporting

The customisable dashboard in Xero displays snapshots of your business' financial performance, enabling you to monitor cashflows and track daily business performance virtually as it happens.

Pre-accounting integration

You didn't go into business to capture receipts and invoices. Our solution tracks, reads and stores your receipts and invoices on the go.

Customer management

Save time by automating workflows. Xero will automatically email invoice reminders to your overdue customers and with a few clicks you can email statements to your entire client base.

Bank feeds

Bank Feeds automatically import transactions directly from your bank, eliminating the need to import transactions manually.

Project management

A simple job costing solution that allows you to track time and expenses against specific jobs. Xero Projects provide a real-time view on how all of your projects are tracking financially.

Access control

In addition to standard login support, Xero provides two-step authentication as an extra layer of security. You are kept informed of when and where users last logged in, which lets you see if any unexpected activity has occurred.

Controls and reports

From who's logging in, to what changes are being made to your business file, Xero provides the tools to help identify mistakes or unwanted activity. The assurance dashboard uses Xero's built-in controls which enables SNG Grant Thornton to monitor the accuracy of your financial data.

Infrastructure protection

Xero is committed to the security of your data and provide multiple levels of protection for personal and financial information. It provides you with high levels of reliability and availability, supported by dependable infrastructure and ongoing security management.

24/7 customer support

With Xero you get free, unlimited support 24/7. When you're looking for answers, start searching in XeroCentral. In the unlikely event that you need further technical support, your team at SNG Grant Thornton can provide advice or training if needed.

Tracking categories

Reporting on how different areas of your business are performing (such as departments, locations or cost centers) to help you make proactive business decisions.

Interpretation of results

Our in house trained staff and directors are available to answer any questions you may have regarding your financial performance.
