Data Verification

SourceDogg's Data Verification Service provides the tools and resources needed to improve the quality of your organisations Supplier Data.

Fragmented and inconsistent Supplier Data reduces supply chain efficiency, impacts spend control and increases the risk of supplier exceptions and misleading reporting.

SourceDogg's global database and advanced suite of cleansing tools unifies and collects current supplier information. Your extracted company data is passed through various matching algorithms to identify and link the data back to a single reference. SourceDogg provides a structured and fully cross-referenceable database that can then be published back to the originating system.

SourceDogg supports all sources of system data, this includes (but is not limited to) SAP, Oracle, Microsoft Dynamics, Saga, Financial Force, home grown systems or legacy systems.

Sample data collection fields:

- Complete Supplier contact names and addresses
- Categories of supply
- Supplier financial information
  - > Company Registration Office Numbers
  - > VAT number and Tax code
  - > Turnover
- Supplier qualifications, policies & documents
- Product and statutory information
  - > Data sheets
  - > PPE regulations
  - > REACH data

Key Benefits:

- Maximise your ERP reporting with enriched data
- Ensure staff have access to current information
- Reduce the risk of suppliers being paid twice
- Plug-ins to your existing ERP system
- Accurately track and optimise enterprise spend

Grant Thornton Strategic Initiatives provides eProcurement facilities that combine complexity of functionality with simplicity of execution – powered by SourceDogg.

The SourceDogg package offers clients an intuitive, easy-to-use interface that is accessible to both procurement specialists and casual users alike.

Scalable to growing and changing client needs, this tool gives clients the opportunity to enhance both the efficiency and effectiveness of procurement within their organisation.

The platform enables:
- **Oversight and direction for all purchasing within a client's company**
- **The sharing of expertise and best-practice**
- **Robust reporting functionality**
- **Detailed insight and analytics.**
